

## Only Politicians Work in Trillions of Dollars— Here's How Much That Is

## Net Worth Qualifier

- **The balance sheet / net worth calculation does not include the power to tax** – the net present value of the sovereign power to tax and the ability to print the world's reserve currency would clearly bolster USA Inc.'s assets – if they could be accurately calculated.
- **Plant, Property & Equipment (PP&E) on USA Inc.'s balance sheet is valued at \$829B<sup>1</sup> (or 29% of USA Inc.'s total stated assets)** – this includes tangible assets such as buildings, internal use software and civilian and military equipment.
- **The PP&E calculation DOES NOT include the value of USA Inc.'s holdings in the likes of public land (estimated to be worth \$408B per OMB)<sup>1</sup>, highways, natural gas, oil reserves, mineral rights (estimated to be worth \$345B per OMB), forest, air space, radio frequency spectrum, national parks and other heritage and stewardship assets which USA Inc. does not anticipate to use for general government operations. The good news for USA Inc. is that the aggregate value of these heritage and stewardship assets could be significant.**

Note: 1) USA Inc.'s holding of land is measured in non-financial units such as acres of land and lakes, and number of National Parks and National Marine Sanctuaries. Land under USA Inc.'s stewardship accounts for 28% of the total U.S. landmass as of 9/10. Dept. of Interior reported 552 national wildlife refuges, 378 park units, 134 geographic management areas, 67 fish hatcheries under their management as of 9/10. Dept. of Defense reported 203,000 acres of public land and 16,140,000 acres withdrawn public land, the USDA's Forest Service managed an estimated 155 national forests, while the Dept. of Commerce had 13 National Marine Sanctuaries, which included near-shore coral reefs and open ocean, as of 9/10. Dept. of Treasury, "2010 Financial Report of the U.S. Government."
